

Login with Local Accounts

GPO Identity Management Service Authentication Guide

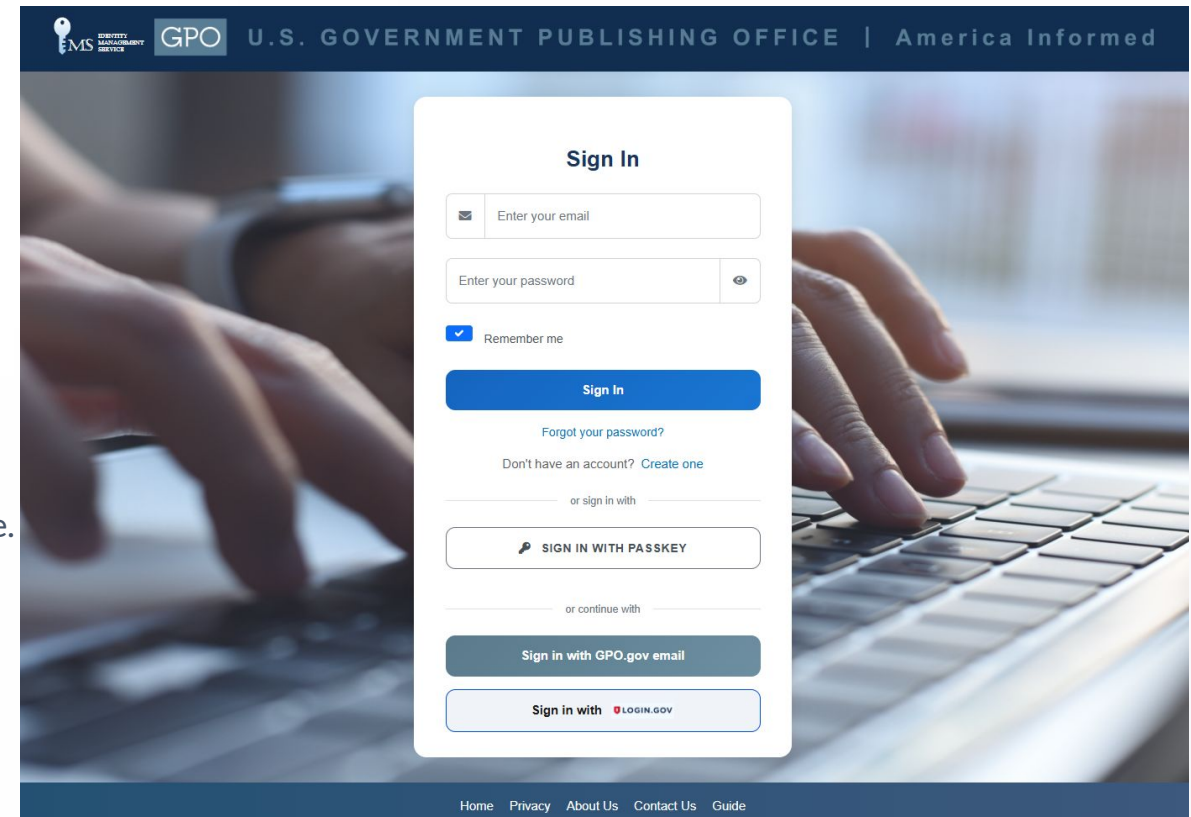

1. Navigate to the Login Page

STEP 1

Accessing GPO IMS

Begin by locating the entry point to the secure portal on the GPO IMS home screen:

- Open your web browser and navigate to the GPO homepage.
- Locate the **Login / Sign In** link
- Clicking this button redirects you straight to the secure authentication page.
- This step loads the login configuration area safely.

2. Enter Local Credentials

STEP 2

Authenticate Profile

Provide your existing credentials registered with the website to verify your identity:

- Type your registered **Email Address** into the username input field.
- Enter your secure account **Password** correctly.
